

I am very concerned that K-LOVE Translators are threatened by the Low Power FM Proposal. Although I very much favor the development of LPFM, I don't think translator systems should be endangered by the employment of LPFM. Here in Colorado, translators provide FM service to many mountainous areas otherwise impossible to reach with single transmitter sites. I cherish listener-supported K-LOVE. I care enough to help support them financially, and any other way needed. Please don't jeopardize the only FM Radio Station my family still listens to. Thank you for your consideration.
